A LITTLE INTRODUCTION

Nuove Digital Media Solutions (formally Bacchus Digital Solutions) formed in 2019, shortly before the COVID pandemic. During the pandemic a decision was taken to split up the organisation into separate divisions (“Unmarked Clothes” and the new “Nuove Digital Media Solutions” or “Nuove DMS”) to give each brand their own independent identity.

Nuove DMS has taken on the same services, clients and portfolio of the old Bacchus Digital Solutions, just with an extra glow to our name! However, we have expanded our services and customer-base to be more digitally creative and automated for a global audience.

Our history goes way further than 2019, with our history and experience dating back to 2013, we have seen our work evolve through the years and with it so has our skills and client base. From starting out as just a Liverpool-based web/graphic design company to now a company that attracts clients from around the globe offering a range of our expanded, exciting new services including, video editing, digital marketing and branding to music production.

Through our vast network of connections, we have developed techniques and amassed vast abilities in various software and online platforms achieving satisfaction amongst our clients.

So, what can Nuove DMS do for you and your business you ask? We can make it GLOW!

#Glowify Your Business

WEB DESIGN & HOSTING SOLUTIONS

In a high-velocity commercial landscape, a secure and professional digital presence is an absolute business necessity.

Your website serves as your company's central focal point—the definitive anchor where partners and clients verify your corporate credentials, review project case studies, and initiate orders.

Given that the vast majority of modern consumers utilise mobile devices to research, socialise, and transact, investing in a high-performance web platform is an asset no growing enterprise can afford to miss.

At Nuove DMS, we understand that operational requirements vary.

Whether your organization requires a streamlined corporate promotional framework or an advanced, automated online Content Management System (CMS), we align our development to match your exact goals.

By partnering with tier-one cloud infrastructure providers, we guarantee rapid page-load velocities, robust server optimisation scores, and secure SSL configurations at optimised, fixed-cost price points.

A non-indexed business loses market share every single day. Let our digital architecture team construct your online environment, integrate your social media matrices, launch your secure client portals, and actively capture the audience your competitors leave behind.

The screenshot displays the WDA #DartsMania website. At the top, the WDA logo is prominently featured next to the hashtag #DartsMania. Below this, a navigation bar includes links for Home, Registration, Standings, Member, Mailer, History, WDA Shop, and Contact Us. A large banner image shows a dartsboard with a green 5 and a red 1 being hit by a dart. Below the banner, the WDA logo is repeated in a stylized blue font, followed by the text 'World Darts Association' and 'Play Darts. Breathe Darts. Live Darts.' The footer section includes the Mates logo and a search bar.

GRAPHIC DESIGN, BRANDING & VISUAL MARKS

Corporate Identity & Graphic Design

Bespoke graphics define the parameters of your brand, centred entirely around your primary visual mark: your logo.

Your logo is the single most critical asset your customers use to gauge your brand's professionalism.

An effective, attention-grabbing emblem isolates your business from the competition, projects instant market authority, and establishes an iconic corporate identity.

High-end graphics say a monumental amount about your corporate standards without needing words or slogans.

The engineering team at Nuove DMS specializes in sculpting responsive vector graphics, animated branding sequences, and cinematic video assets tailored to your deployment specifications.

All project assets are built to scale fluidly across high-resolution displays and mobile viewports with zero pixelation or distortion.

Whether you require a comprehensive brand overhaul or standard visual media management, our designers transition your baseline concepts into striking, digitally realised corporate assets.

All initial draft options, conceptual colour palettes, and variants are provided via watermarked reviews to ensure seamless collaboration prior to final secure file delivery.

STATIONERY DESIGN & PREMIUM OFFLINE PRINT

Stationery Design & Corporate Print

Although modern commerce accelerates heavily into the digital space, premium printed business stationery continues to play a vital operational role.

High-end physical touchpoints represent a permanent, real-world introduction card.

Carrying professionally designed media ensures you can establish networking trust, exchange corporate details instantly during face-to-face consultations, and keep your business top-of-mind long after digital links have been closed.

Owning an active enterprise means your brand reputation is on display continuously.

Whether hand-delivering local community promotional flyers or exchanging crisp business cards featuring integrated QR code redirections, the tactile quality of your print media defines your professional standard.

Nuove DMS engineers unified corporate document layouts tailored for global administrative standards.

We design cohesive templates for custom invoices, letterheads, packing slips, and corporate compliment sheets that you can store securely on your network and print on demand.

Eliminate the compromise of using generic, pre-made office assets, and let every transaction reflect absolute corporate professionalism.

B2B PROCUREMENT & CORPORATE BUSINESS SUPPLIES

Business Supplies & Media Procurement

An enterprise cannot operate efficiently without stable basic amenities.

From baseline office consumables to commercial cleaning utilities and specialised technical equipment, Nuove DMS manages your supply chain seamlessly.

Our B2B procurement service provides corporate clients with the necessary provisions for the smooth, un-interrupted operation of their daily workflows.

By cultivating long-standing partnerships with leading trade wholesalers, we bypass standard retail markups and deliver your required products at optimised price structures.

We organise these supply fields clearly within our digital store, completely removing the administrative burden of sourcing inventory manually.

To further support your company's cash flow management, we offer flexible payment accounts and structured billing plans tailored explicitly to your procurement volume.

Minimize your operational overhead and consolidate your supply chain with Nuove DMS.

COMMERCIAL RETAIL CONSULTING & POS DISPLAY STRATEGY

Retail Consultancy & Service Optimization

Nuove DMS extends its expertise far beyond digital computer environments.

Backed by structured real-world management experience within national-chain corporate environments, we deliver high-impact retail consultancy services for convenience stores, independent retailers, and local newsagents.

We inspect your commercial site layout to execute bespoke floor plan reorganizations and stock shelf re-arrangements engineered explicitly to maximise purchase velocities and scale your overall store sales.

Managing a modern retail storefront involves long, demanding hours spent balancing inventory procurement, pricing models, and direct customer relations.

Having an optimised, customer-friendly store layout significantly alleviates this operational workload.

Our consultancy team optimises your space to secure easy accessibility rows, streamline stockroom organisation, issue strategic plan-o-grams, and establish strict date-checking schedules to eliminate inventory wastage.

Additionally, we engineer tailored Point-of-Sale (POS) display layouts and high-contrast promotional media for digital Till Display Monitors (TDMs).

Utilise our commercial retail experience to unlock your store's true revenue potential.
